Office Action Summary

Art Unit: 1761

1. Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph. The claims are narrative and replete with indefinite and functional language. The claims will be in one sentence form only. Note the claim format in the cited patents.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Obara et al (Example 3) or Uchida et al (Example 74) in view of Given's Encyclopedia of Cooking. Both Obara et al and Uchida et al disclose fish sausage products including various additives. It would have been obvious to include potatoes as an ingredient in the fish sausage of either patent since potatoes are a well-known component of fish cakes made from fish pieces, as evidenced by the encyclopedia article. Further, new recipes which involve addition or elimination of common ingredients, or for treating them in ways which differ from former practice, do not amount to invention merely because it is not disclosed that no one else ever did what applicant did. Applicant must establish a cooperative relationship between ingredients which produces a new, unexpected and useful function (In re Levin, 84 USPQ 232).
